

IF YOU WANT TO EAT DÖNER, BUT NO MEAT

This new product, under the name Green Doner Kebab, is **100% vegan** and is **based on soy**. It is roasted like a chicken or veal Doner on a vertical grill.

The basis for this vegetarian Doner is our plant meat. This product has the characteristic that it has a high protein and a low fat content. It is gluten free and comes from soy plants that are **GMO free** grown in Europe.

TASTY

Our meat-free Doner is made with authentic herbs and spices. If it is prepared on a kebab grill you get that delicious roasted flavour. Our special soy raw material ensures that the structure of meat is recognizable in taste. Our product tastes just like the meat varieties.

HEALTHY

Our product contains sufficient (vegetable) proteins. It has a low fat content and is rich in fibre. It is gluten-free and contains no animal ingredients, so it is 100% Vegan.

MORE SUSTAINABLE

During the production of this meat-free product, lacking manure, so less greenhouse gas emissions. There is less water, land and energy used in the production of this product.

If restaurants choose Green Doner Kebab skewers, they can serve a group of consumers - who do not eat meat - with Doner Kebab. This product comes in different weights. It contains a sleeve that fits a Kebab grill skewer. Green Döner Kebab is prepared like the meat varieties. After a brown crust has formed during roasting, the Doner can be cut from it. **No ingredients of animal origin** have been processed in our recipe. This product is **100% vegan**. As far as allergens are concerned, this product contains soy and can contain traces of Lupine.
